

Yan, S. (2019). Does criminal specialization predict case processing? *Crime & Delinquency*, 65(12), 1648-1688. <https://doi.org/10.1177/0011128718765123>

This is a post-review, pre-copyedit version of an article published in *Crime & Delinquency*. The final version of record is available at the link above.

Erratum: In the version of record, Tables 8 and 9 had wrong titles. The correct titles of the tables are:

Table 8. Logistic regression models explaining incarceration, conditional on non-**dismissal**

Table 9. OLS regression models explaining incarceration length, conditional on **incarceration**

The running text in Results section contained the correct description of the model selection criteria, which was inconsistent with the table titles. My apologies for the confusion this may have resulted in.
